### BEST PAPER AWARD 2004

Two years ago, the EURASIP Administrative Committee installed an Annual Best Paper Award for the EURASIP Journal on Applied Signal Processing, in recognition of the continued growth of the journal as well as the quality of the papers it publishes. The 2004 Award covers the 17 issues published in 2004, with well over 200 papers.

The 2004 Best Paper Award Committee consisted of Professor Mats Viberg (Chalmers University, Göteborg, Sweden), and EURASIP JASP Associate Editors: Professor Phillip Regalia (Institut National des Télécommunications, Evry, France, and Catholic University of America, Washington, USA), Professor Jaako Astola (Tampere University of Technology, Tampere, Finland), and Professor Hideaki Sakai (Kyoto University, Kyoto, Japan).

From a shortlist of eleven papers nominated by the members of the Editorial Board and/or Guest Editors of the special issues, the Award Committee decided to give the 2004 Best Paper Award to the paper entitled “*Group-Oriented Fingerprinting for Multimedia Forensics*” by Z. J. Wang, M. Wu, W. Trappe, and K. J. Ray Liu which appeared in EURASIP JASP, vol. 2004, no. 14, 2153–2173.

I sincerely congratulate the authors on this award. I also would like to thank the EURASIP JASP Award Committee for their outstanding selection work. The 2004 Award will be presented at the EUSIPCO 2005 Awards Ceremony, Antalya, Turkey, September 2005.

### EDITORIAL BOARD
